

How to convert your Project Notebook into html format?

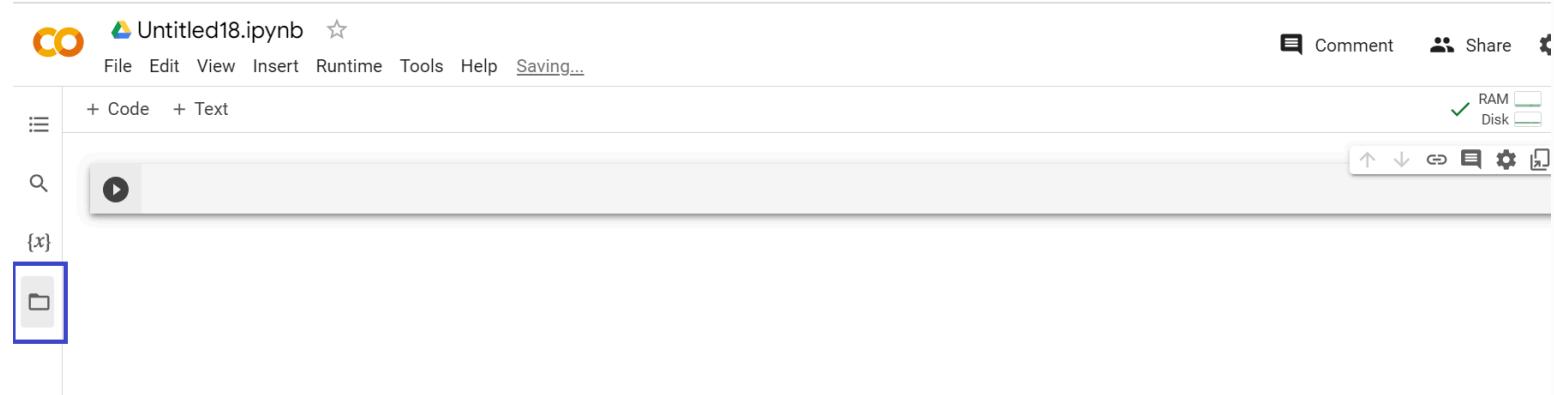

1. After you've written all the code in your project notebook, start running it from the first cell, all the way to the bottom.
2. Once all the cells are executed successfully, download the notebook as a .ipynb file.

3. Go to the Colab website (<https://colab.research.google.com>)

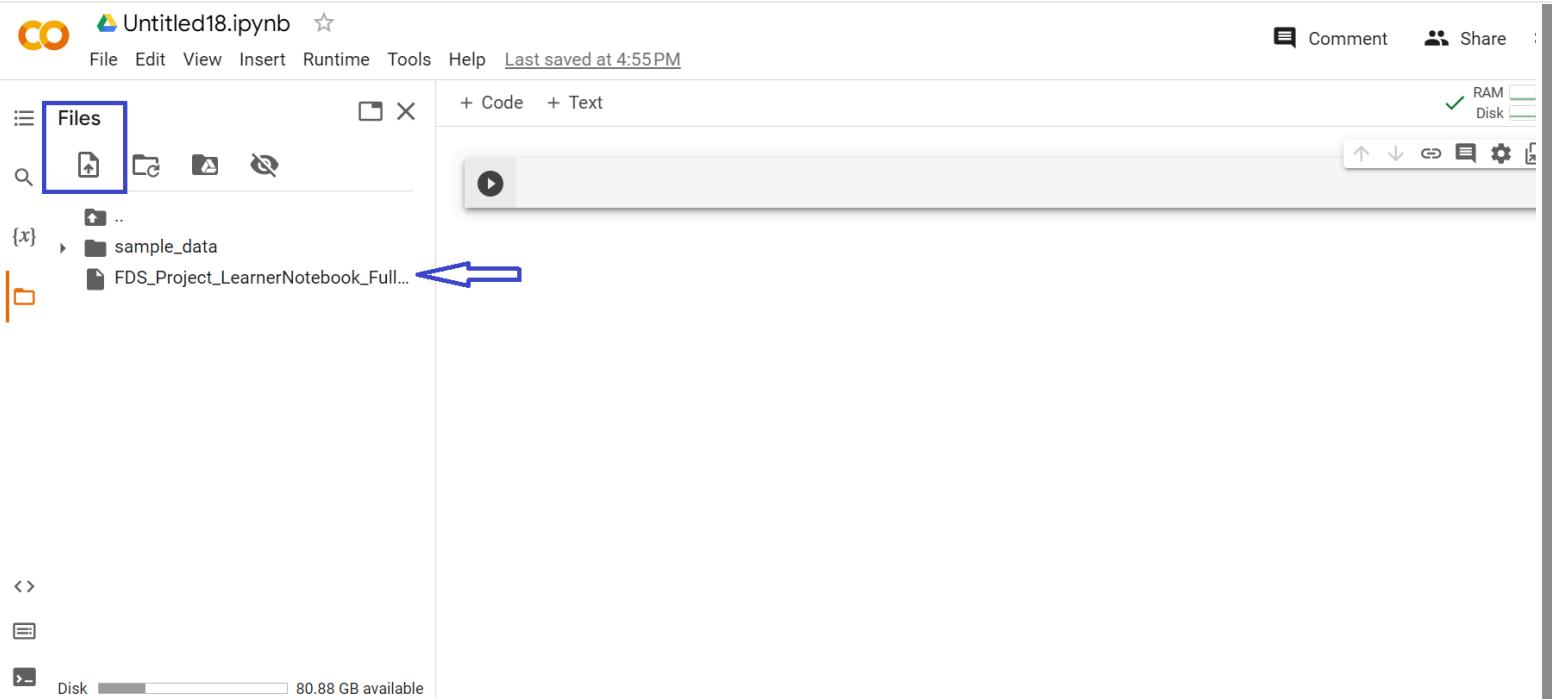

4. Open a new notebook there.

5. The screen will look like the below image Click on the **Files** icon on the left.

6. Once you click on the above-annotated icon, you will be able to see the upload icon under the new sidebar that has opened up - Files. Look for the project notebook that you just downloaded and upload to Colab again.

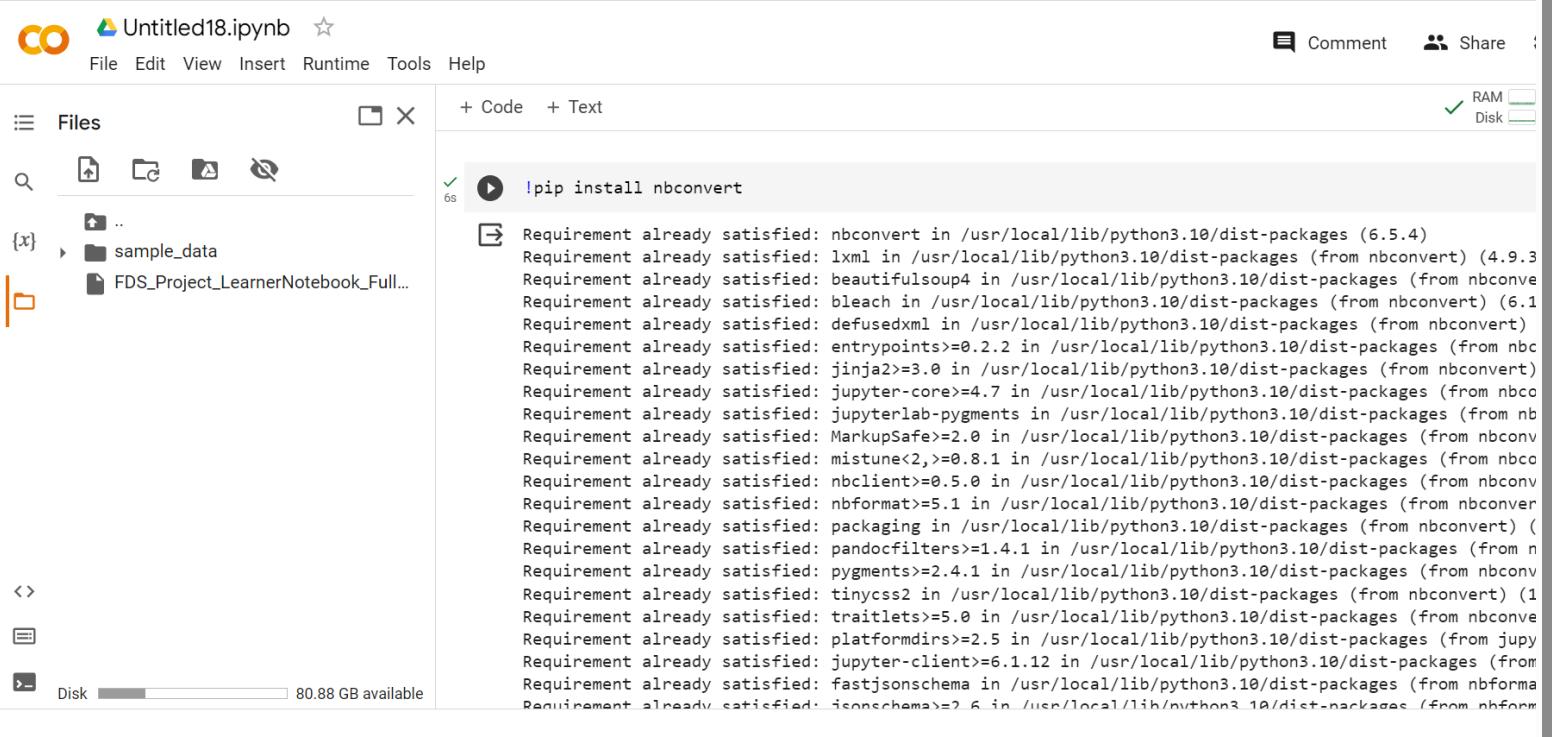

How to convert your Project Notebook into html format?

8. To convert this notebook into an HTML file, use the following command and run it inside a code cell.

```
!pip install nbconvert
```

```
! jupyter nbconvert --to html 'FDS_Project_LearnerNotebook_FullCode.ipynb'
```

How to convert your Project Notebook into html format?

The screenshot shows a Jupyter Notebook interface. On the left is a sidebar with file navigation icons and a list of files: 'sample_data' and 'FDS_Project_LearnerNotebook_Full...'. The main area has a terminal window at the top showing the output of a command: 'Requirement already satisfied: ...'. Below the terminal is a code cell containing the command: 'jupyter nbconvert --to html 'FDS_Project_LearnerNotebook_FullCode.ipynb''. The bottom status bar indicates the command was run 6s ago.

9. You can now download this HTML file, along with the IPYNB file. There will be two files that you will now be able to see in the sidebar:

1. one in IPYNB format,
2. and the other in HTML format

The screenshot shows a Jupyter Notebook interface with a notebook titled 'Untitled18.ipynb'. The sidebar shows files: 'sample_data' and 'FDS_Project_LearnerNotebook_Full...'. A context menu is open over the 'FDS_P' folder, with the 'Download' option highlighted by a blue arrow. The main area shows a terminal cell output and a code cell below it.

Note:

If we try to use the HTML conversion code on the project file you have worked on, an error will occur.
